

InfectProtect

Exclusive DIY Antimicrobial Kit For Commercial Vehicles

24/7 **protection**
against viruses &
bacteria for only
£0.12 per day!

Independently Tested

Efficacy has been rigorously tested by independent labs to 99.999% against coronavirus strains and superbugs. Certified to recognised standards: EN 14476 & PAS2424:2014

Incredibly Versatile

It can be applied to porous (fabric, wood, leather, etc.) and nonporous (plastic, metal, glass, etc.) materials, making it perfect for the variation of materials within a vehicle.

Microscopic Protection

This coating works at the molecular level to covalently bond with the surface it is applied to. This is invisible once dry and has no odour.

Minimum 60 Days

Our certified 60 day test results show a remarkable 99.999% / 5 log reduction in microbial activity after only 5 minutes of applying them to the coated surface.

Scientifically Proven & Formulated In The UK

Protect Professional is exclusively distributed by InfectProtect and is formulated and independently tested in the UK by a 35 year old, Queens award winning company.

Kit Includes:

- ✓ Electric Mist Sprayer
- ✓ Protect Professional Antimicrobial Coating
- ✓ M Wipes - For hard to reach areas
- ✓ Pouring Funnel
- ✓ PPE (Gloves, Glasses & Face Masks)
- ✓ Window Stickers

InfectProtect

How To Apply & Maintain 24/7 Protection

Three Simple Steps

Fill the Sprayer

Unscrew the spray head and use the funnel to pour 1 Litre of the Ready to Use solution into the sprayer bottle.

Coat As Instructed

Use the electric sprayer to evenly spray a fine mist of our antimicrobial coating throughout the vehicle and leave to dry naturally.

Wipe Into Areas

Spray onto M Wipes and spread coating into hard to reach areas and across the main touch points.

Main Benefits

After applying our coating to articulated lorries, vans, taxis and fleet cars nationwide, we've taken our learnings and built a DIY kit that allows you correctly install our long lasting antimicrobial protection in your own vehicles.

No Additional Chemicals

Our antimicrobial coating kills 99.999% within 5 minutes, for upto 60 days.

Simple To Apply

Our coating is simple to apply using the equipment provided.

Keep Drivers Safe

Enough coating for 8 months occupant protection.
